

# Technical Appendix 7-2

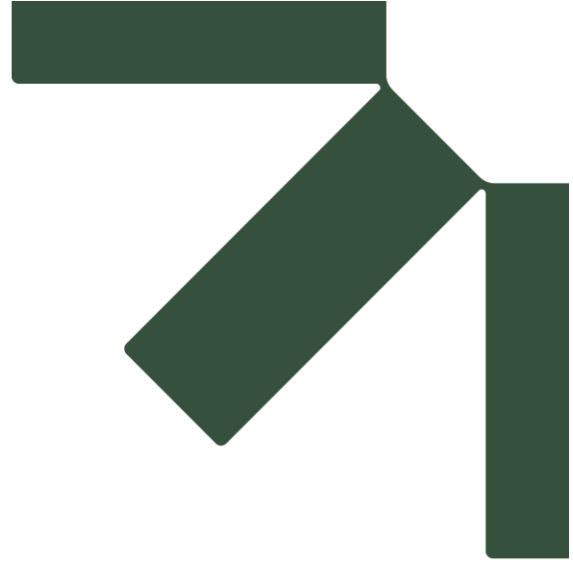

## Site Visit Details

**EIAR – Volume 3**

**Muingmore Wind Farm**

SLR Project No.: 501.065301.00001

April 2026

**Description:** Location of the proposed onsite substation, looking west

**Description:** Location of the proposed onsite substation, looking northwest

**Description:** Photo taken just west of the proposed substation, looking southwest

**Description:** Photo taken just east of the proposed substation, looking northwest

**Description:** Looking west, towards the proposed turbine T1

**Description:** Photo showing the existing access road and peat drains at the northern area of the Main Wind Farm Site, looking north

**Description:** Looking west towards the proposed turbine T1

**Description:** Location of the proposed onsite substation, looking west

**Description:** Showing the location of the proposed substation, looking north

**Description:** Photo taken just north of the proposed substation, looking north towards T3

**Description:** Photo shows an existing access road and location of the proposed turbine T5, looking north

**Description:** Photo taken to the north of the proposed substation, looking east

**Description:** Photo taken to the west of the proposed turbine T1, looking southeast

**Description:** An existing pond approximately 320 m northwest of the proposed turbine T8, looking south

**Description:** An existing pond approximately 320 m northwest of the proposed turbine T8, looking west

**Description:** The unnamed EPA stream at the local road L1205, looking north

**Description:** The unnamed EPA stream at the local road L1205, looking north

**Description:** Photo taken approximately 0.5 km southeast of the proposed turbine T4. It shows the unnamed stream, no active flow, looking east

**Description:** Photo taken approximately 0.3 km southeast of the proposed turbine T4. It shows the unnamed stream, no active flow, looking east
